

THE MCEWING FISH GRABBER

The McEwing fish grabber is a nylon or leather glove strong enough to prevent the fisherman from losing his fishing pole to a large fish, or simply off of his boat or dock. It can easily fit on either hand, by way of a buckle strap or adjustable "touch" closures, to adjust to a comfortable fit around either wrist. This device also has three long straps that easily attaches around the bottom of the fishing pole, by way of buckle straps, or touch closures, to give the fisherman even more confidence in securing his pole, while fishing. Three universal sizes will easily fit around any size wrist for men, women, and even children. This device can also fit around any small pole, tree, or even the handle of a tackle box, while fishing off the shore, bank, or boat. It's strong, however light to provide extra comfort for any weather conditions, especially on those hot and humid days. The five colors for the McEwing Fish Grabber are black, brown, white, red, and even pink for some women of choice. In closing, The McEwing Fish Grabber will literally make fishing more relaxing, more enjoyable, and much more fun for anyone who enjoys fishing.
